

## Suggested invite information

Each WhatsApp group will have a different scope and purpose. Specific information relating to each should of course be provided in context.

To cautiously satisfy GDPR considerations it is prudent to simply explain what the purpose of the group is and what information individuals will be sharing with others when they join by clicking on the link provided to them.

A key aspect here is that the individuals are being presented with the option to join and are then actively making the decision to do so themselves.

Consider using something along the lines of the following:

*Joining this group will enable to you to receive information from, and engage with, your fellow UNISON members and reps.*

*As WhatsApp is linked to your mobile phone joining any group will display your number to other participants. You can however restrict the profile information you share with others by changing your privacy settings in WhatsApp.*

*All members of the group are expected to adhere to our WhatsApp Group Agreement.*
